DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1, 14, 19, and 20, a processor 20 (see figures 1A or 1B) executing a plurality of test instructions operable to test a device (18), thus, the processor (20) can not generate the plurality of test signals associated with the plurality of the test instructions, but a test assembly (12) generating a plurality of test signals, from HSD module and RF module, associated to the executed test instructions. Further, an interface apparatus (16) should comprising a plurality of connectors, and each connector operable to communicate the test signal for communicating in responding the test instructions comparable with generated test signals from test assembly by HSD module and RF module to apply to test the device.

The claim languages need to be concise and point out clearly the subject matter that applicant regards to the invention. Correction is required.

The same problem occurred to claim 11, when applicant claimed an apparatus for communicating a plurality of signals. What a process generated a radio frequency

and a processor generated a high speed data signal? And how to get the comparable testing signals that applicant want to refer to the invention? Correction is required.

Allowable Subject Matter

2. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The reasons for allowance will be provided when applicant submitted the amendment to correct all the issues that render the claims invention indefinite as set forth in the 112 rejections above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
